

For the professional tour, a visit was scheduled to a goat dairy factory in Cluj and a farm with 1700 goats (Alpine and Saanen). With regret, we had to give up visiting the cheese factory because of the long distance. The visit to the goat farm in Satulung (Maramures county), however, was very interesting. The farm owner has been applying the French technology of breeding and exploiting goats so that the results in terms of production and reproduction are exceptional. After visiting the farm, all the 40 participants enjoyed the Romanian traditional food and the cheerfulness was at its peak after the tasting of Romanian plum brandy. The tour was exceptional, unanimously appreciated, which made the participants forget the regret of not visiting the dairy factory as well. In the evening, the participants said goodbye and promised to meet again in Antalya (Turkey) in 2016.
